NATUREPEDIC: ABOVE + BEYOND	26
WE CAN ALWAYS DO BETTER	30
THE FUTURE	32

Through 2020, Naturepedic expanded its mission of producing healthier sleep options, while initiating changes in its supply chain to further promote environmental sustainability. While 2020 was a battle with Covid-19, Naturepedic persevered and did its part by manufacturing organic cotton face masks and selling them at cost.

The company continued to advocate for a healthier lifestyle by expounding on the sleep advantages of an organic mattress and by educating the public on going green in general. Covid-19 has brought the importance of living healthy to the forefront and raised organic awareness. The organic market is growing and Naturepedic is a major player leading the way.

Naturepedic has focused its efforts on protecting infants, children and the environment from toxic chemical substances and have worked with **The Childhood Cancer Prevention Initiative**. We have participated in lobbying efforts to outlaw the use of toxic chemicals in consumer products. The lobbying efforts entail educating the public, meeting with our politicians in Washington D. C. and making sure that they are aware of the crisis at hand, and supporting the battle against poisoning the next generation of infants and children who will come in contact with products that contain dangerous chemicals, i.e. crib mattresses and more.

While we continue to make non-toxic high-quality products, we also continue the never-ending quest to eliminate the use of poisons in our environment. There are alternatives and we strive to make everyone realize it. For more information, go to naturepedic.com.

IT'S ABOUT THE MATERIALS

Naturepedic believes in the importance of indoor air quality, and to help promote this Naturepedic does not use vinyl, phthalates, chemical flame retardants, flame barriers, polyurethane foam, formaldehyde, pesticides, GMO's, glues/adhesives, or any other chemicals which can be released into the environment.

ORGANIC COTTON

Naturepedic's commitment to organic cotton contributes to healthier soils, decreased pesticides use and other environmental benefits. Naturepedic exclusively uses organic cotton fiber and fabrics instead of conventionally processed cotton.

The company's certification to the Global Organic Textile Standard (GOTS) expressly forbids the use of conventionally produced cotton.

The benefits of organic cotton over conventional cotton are numerous. **The Rodale Institute** (2008) estimates that organic farming removes carbon dioxide from the atmosphere by as much as three times the rate of conventional farming practices.

A 2018 report by the **Organic Trade Association** estimates that conventionally grown cotton releases 220 million metric tons of carbon dioxide globally each year. Additionally, in the United States alone, conventional cotton farming used approximately 48 million pounds of pesticides, 30% of which was glyphosate (Round Up) pesticide.

"A Life Cycle Assessment of Organic Cotton" published on behalf of the Textile Exchange in 2014 found additional environmental benefits to farming organic cotton. The report estimates that organic cotton, compared to conventional cotton, delivers a 46% reduction in global warming potential, 70% less acidification potential, and most notably a 91% reduction in the use of "blue water", i.e. water withdrawn from groundwater or surface water bodies. The report also found organic cotton fiber was responsible for a 62% reduction in primary energy demand vs. conventional cotton fiber.

Naturepedic sources raw organic cotton batting from a collective of organic growers in Texas. Approximately 65% to 70% of the land on which these members grow organic cotton uses only "rainfed" water and no irrigation at all. When irrigation is used, these farms focus on more efficient irrigation techniques, primarily center pivot irrigation systems equipped for low energy precision application.

Fabrics made from conventional cotton are often processed with chlorine bleach and formaldehyde. Many of the dyes used to color the fabrics, contain heavy metals and azo dyes, all with potential health and environmental risks. The cotton fabrics used by Naturepedic are made from organic cotton fibers, untainted by toxic chemicals, and are certified organic.

ORGANIC WOOL

Naturepedic uses only GOTS certified organic wool which ensures that the sheep providing the wool are treated in a sustainable and humane fashion. The GOTS certification guarantees that the sheep are not fed any foods that have been grown with un-approved pesticides or GMO seeds.

ORGANIC LATEX

Naturepedic uses certified GOLS (Global Organic Latex Standard) organic latex sourced from rubber trees grown using verified sustainable methods. Naturepedic latex is made using the Dunlop process which only uses heat for curing (unlike Talalay latex which uses synthetic chemicals). Naturepedic does not use synthetic latex, polyurethane foam, memory foam or any mixtures thereof.

Naturepedic also uses FSC (Forest Stewardship Council) certified latex. FSC latex is permitted in a GOTS (Global Organic Textile Standard) certified organic mattress, just like GOLS latex is permitted. GOTS examines the production process of GOLS and of FSC, and GOTS has determined that both are acceptable in a GOTS certified organic mattress.

FSC is different than other programs in that it specializes in sustainable forestry management and GOTS has determined that this is a critical item. Having reviewed the updated GOTS standard, we are following the GOTS lead. As such, although most of our latex continues to be GOLS certified latex, we also use FSC certified latex (which is also certified by Rainforest Alliance). Naturepedic advocates for increased emphasis on sustainable forestry management.

FOOD-GRADE POLYETHYLENE

Naturepedic uses bio-sourced polyethylene for waterproofing. All Naturepedic polyethylene meets food grade specifications. In 2016, working closely with vendors, Naturepedic began sourcing bio-preferred polyethylene made from non-GMO sugar cane. This polyethylene is used for Naturepedic's waterproofing methods (covered by U.S. Patent No. 9,259,096 and other patents pending).

WOOD, CARDBOARD AND PAPER

All paper, cardboard and printing used by Naturepedic are evaluated for lifecycle concerns. The majority of Naturepedic's packaging materials are printed locally in Ohio to reduce the carbon footprint associated with shipping.

Package printing is largely done with soy inks and the commercial printer we use maintains a valid FSC (Forest Stewardship Council) chain of custody certification. Labels are FSC certified, and cardboard packaging contains the highest possible amounts of recycled content.

All wood used by Naturepedic is FSC certified, whether for manufacturing mattress foundations or for building office shelving.

Naturepedic supports local vendors and businesses. Naturepedic has assisted several vendors in obtaining FSC certification. Initially earning FSC certification can be a lengthy and time-consuming process. Naturepedic volunteered their certification expertise to help these businesses write, design and institute policies supporting Forest Stewardship Council standards and their mission of responsible forestry.

PRODUCT INNOVATION

AMERICAN MADE

Naturepedic manufactures all mattresses at its Ohio manufacturing facilities. When possible, materials are sourced domestically. For example, organic cotton batting is grown by Texas farmers, and some fabrics are also made in the U.S. Other materials are purchased globally due to a lack of certified organic domestic supply. Latex foam is made overseas using latex collected from rubber trees, which cannot be grown in the United States. Fabric is finished by talented seamstresses at Naturepedic's Ohio facility. Even items such as shelves and foundations are produced in America, either at Naturepedic's in-house woodshop or by local Amish craftspeople.

MODULAR DESIGNS

Naturepedic mattresses use modular designs to decrease waste yet maximize comfort. The modular designs allow consumers to replace only select components while keeping the majority of the mattress intact. This design feature means that when a consumer desires a change or needs to replace a damaged part, they only need to replace the part they need. Naturepedic luxury mattresses allow for a zip-out top layer that can be replaced as needed. A benefit of this design is that huge amounts of discarded mattresses are diverted from landfills.

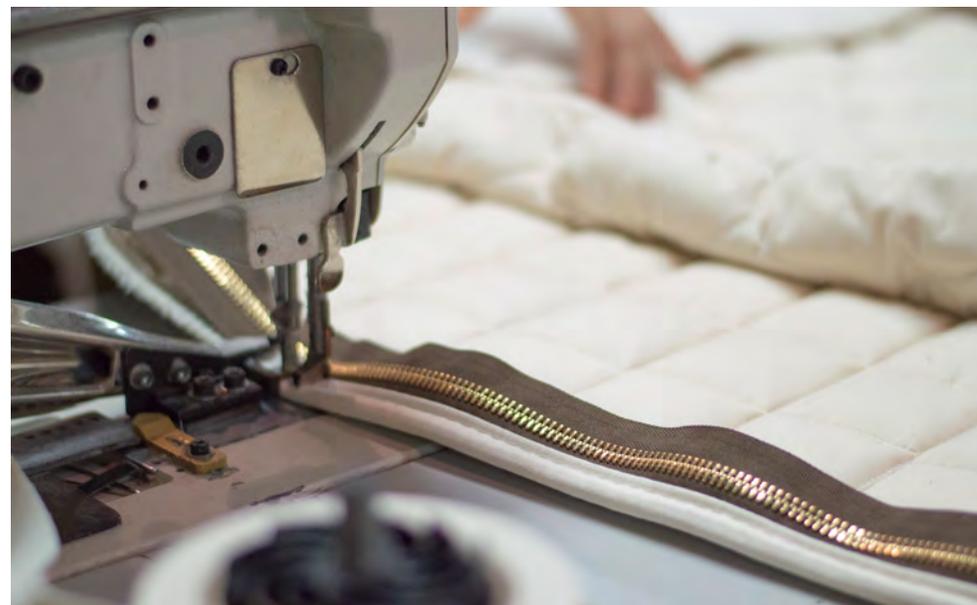

SUPPLIERS

Naturepedic holds its vendors to the highest standards of quality and environmental stewardship and seeks businesses with demonstrated commitments to the environment and social justice. Naturepedic vendors collectively hold an impressive collection of certifications for both environmental and social standards. Naturepedic requires that all its suppliers are certified organic, as it relates to the supplier's product, to meet Naturepedic organic standards.

NO FLAME RETARDANT CHEMICALS + NO FLAME BARRIERS

All Naturepedic products meet all Consumer Product Safety Commission (CPSC) fire safety requirements without using any flame retarding chemicals or barriers.

GLUES + ADHESIVES

In an effort to keep the brand free of potentially harmful chemicals, Naturepedic does not use glues or adhesives in any of its products. Binding is achieved by sewing, heat-sealing, or the use of physical clips.

A stack of folded white bedding, including a sheet and a pillowcase, is placed on a quilted surface. The quilted surface has a repeating pattern of the words "ORGANIC COTTON" embossed in a light color. The background shows more bedding, including a pillow with a floral pattern.

CERTIFICATIONS

Naturepedic recognizes the confusion in the marketplace created by vague and often misleading green claims found on everything from cleaning products to office products. Naturepedic takes a strong stance against “greenwashing” and carefully reviews all language it uses on marketing and other written materials in an attempt to both provide consumers with a clear understanding of the claims, and, when appropriate, show how such claims are measured and validated.

To that end, Naturepedic uses reputable third-party certifications and validations to provide consumers with a better understanding of Naturepedic products.

Organic
Certified by Control Union
CU864025

GOTS

All Naturepedic mattresses are independently certified organic and nontoxic according to the **Global Organic Textile Standard (GOTS)**. This standard certifies that fair labor practices were followed every step along the way, from the agricultural phase to the final manufacturing. The standard certifies that any animals used to produce textile fibers have been treated and cared for in a humane fashion.

Organic
Made with ≥ 95%
Certified Organic
CU864025

GOLS

All Naturepedic latex and latex mattresses are certified to the **Global Organic Latex Standard (GOLS)**, ensuring that the latex was made using sustainable processing methods and organically grown raw materials. Similar to GOTS, GOLS also requires that the latex is made using fair labor practices and sustainable farming.

Certified by Control Union
CU864025

OCS100 ORGANIC CONTENT STANDARD

Naturepedic demonstrates that the cotton used in its products is organic by certification to the **Organic Content Standard (OCS 100)**. Naturepedic uses the OCS100 standard procedures, which tracks the trail of organic cotton material from its source to the finished product.

MADE SAFE

In 2016, Naturepedic products were certified to the **MADE SAFE** standard and has continued to maintain that certification. MADE SAFE screens ingredients to verify that a product has been made with materials that are not known or suspected to cause harm to human health. The MADE SAFE review covers an extensive range of chemical toxins, some of which are listed in their logo.

GREENGUARD® GOLD

The **GREENGUARD Certification ProgramSM** is a third-party testing program for volatile chemical gas emissions from consumer products and materials. GREENGUARD is associated with Underwriters Laboratories (UL). GREENGUARD tests for criteria based on industry and governmental standards. UL tests look at formaldehyde, one of the most toxic and prevalent industrial chemicals in use and certifies that consumer products are Formaldehyde-Free. All Naturepedic products are certified to the UL/GREENGUARD Gold Certification standard. GREENGUARD® certifies products for low chemical emissions, and GREENGUARD Gold is the highest available level. All Naturepedic products are certified to be UL Validated Formaldehyde Free.

FSC-C123979

FSC® / RAINFOREST ALLIANCE / PREFERRED BY NATURE

Naturepedic has earned an FSC® (Forest Stewardship Council®) Chain of Custody (CoC) Certification for its latex and wood (FSC® License Code C123979). This certification, issued by Rainforest Alliance under Preferred By Nature (formerly NEPCo), demonstrates that Naturepedic has instituted a validated internal audit system that allows the company to accurately track and verify latex and wood to the individual product level. **FSC certification** concerns forestry products – not only ensuring the use of agricultural sustainability practices but also holding standards for fair labor practices and safe work conditions.

USDA

Naturepedic uses U.S.-grown, USDA-certified organic cotton as filling for its mattresses. In addition to requiring that cotton be grown without synthetic pesticides or fertilizers, the **USDA National Organic Program (NOP)** also demands that organic crops be grown without genetically modified organisms (GMOs).

Note: the USDA certification and logo applies to the raw agricultural fibers such as cotton and wool.

VEGAN CERTIFIED

In 2018, Naturepedic developed a vegan organic mattress product line. This mattress line is certified by **Vegan.org** and not only contains no harmful chemicals or GMOs but has no animal material substances used in its manufacture or in the final product.

PETA

Following along with the development of our vegan mattresses, in 2019 Naturepedic became certified by **Peta** (People for the Ethical Treatment of Animals). While our vegan mattresses do not involve animals, our other mattresses sometimes use wool from sheep. The wool is collected in a humane manner and the sheep are treated ethically. GOTS (Global Organic Textile Standard) and OCS100 (Organic Content Standard) certify our wool producers, suppliers and our usage to meet their standard of ethics corresponding to Peta's standard.

SUSTAINABILITY

RECYCLING

Naturepedic recycles polyethylene, attained both from scrap collected during the mattress production phase and from scrap collected from damaged product. The material volume of the polyethylene scrap is reduced by a 90:1 ratio in a machine called a foam densifier, and produces a polyethylene “brick”, which is then sold as recycled material in the marketplace.

In addition, Naturepedic uses recycled steel to manufacture its own mattress coil springs. However, the largest effort towards sustainability by Naturepedic is mattress recycling. In 2020, Naturepedic invested approximately \$19,000 towards the recycling of old mattresses.

Most recently, Naturepedic has started an association with a recycling company called “Go Load Up”. This company has nationwide coverage for removal and recycling of mattresses, making the process more efficient and customer accommodating.

Naturepedic continues to explore ways to keep mattresses out of landfills and protect the planet. In addition to donating and recycling, ALL Naturepedic mattresses are made without toxic chemical that can leach into the environment. By combining safer materials, offering innovative design, and working with charity and recycling services, Naturepedic employs a responsible and sustainable end-of-life approach to mattresses.

CALIFORNIA PROPOSITION 65

California is a leader in working towards banning the use of toxic chemicals in consumer products. Many other states, as well as the federal government, often follow their lead. Their ultimate goals are reflected in Naturepedic products, namely no toxic chemicals used in consumer products. Naturepedic is in full compliance with California Proposition 65 or simply "Prop 65" and has been since the company was formed. Proposition 65 is managed through the **California OEHHA** (Office of Environmental Health Hazard Assessment).

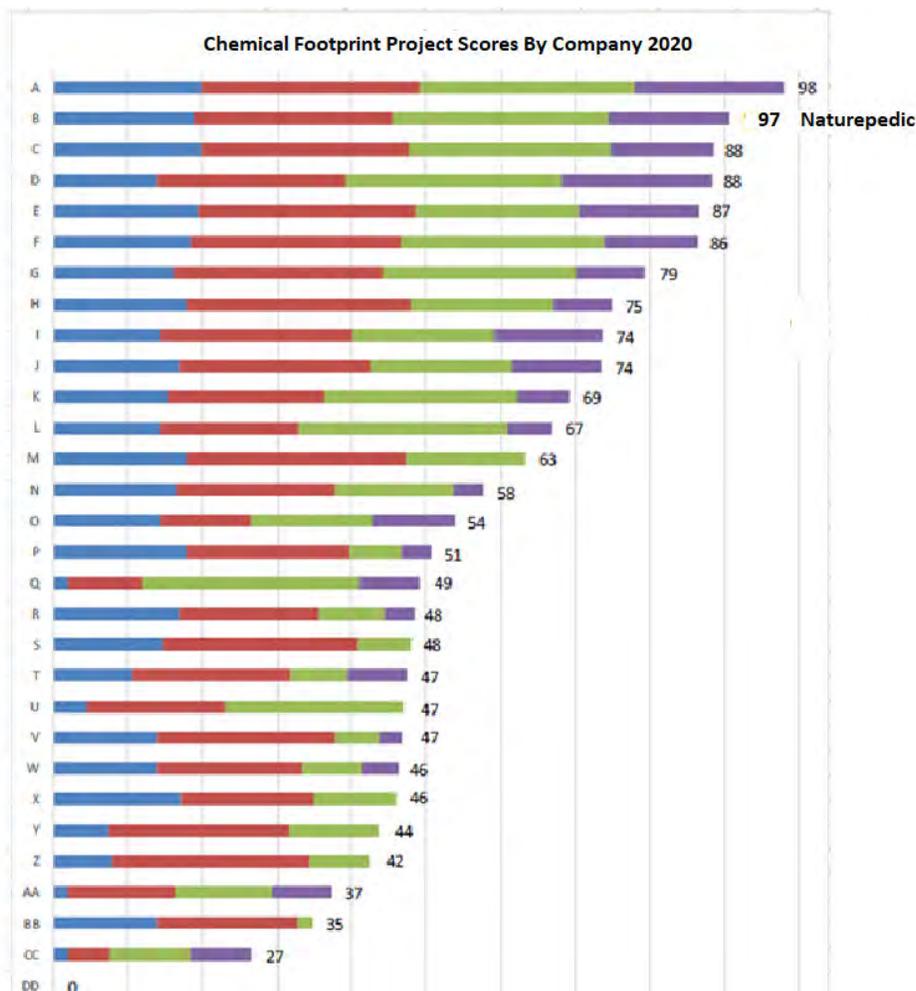

CHEMICAL FOOTPRINT PROJECT

Naturepedic participates in a voluntary evaluation of its overall social and environmental sustainability as well as its management of chemical usage. This evaluation takes the form of an in-depth survey of our operations at all levels. The survey is administered and evaluated by a sustainability organization called **"Clean Production Action"** (CPA).

The survey is called **"The Chemical Footprint Project"** (CFP) and it evaluates a company's Management Strategy, Chemical Inventory, Chemical Footprint Measurement, Public Disclosure and Verification of all supplied company information.

Naturepedic has submitted to evaluation in 2020 along with over 30 other companies, big and small. The survey is scored on a 100% basis. Out of all the companies surveyed, Naturepedic placed 2nd with a score of 97%. Naturepedic continues to collaborate with CPA and continues to evaluate itself with CFP.

OFFICES + FACILITIES

Naturepedic runs its day-to-day operations to promote its values and live out its mission. Sometimes it is the small, symbolic moves that showcase this philosophy. Some of the gestures one can see around the Naturepedic office include:

- Drip coffee makers rather than individual cup machines using plastic pods
- Paperless payroll system saving thousands of pages of wasted paper per year
- Efficient water filtration drink stations throughout its facilities
- Use of organic and less toxic cleaning supplies
- Use of 100% recycled copier paper
- Use of Forest Stewardship Council certified paper
- Installation of light timers in bathrooms to prevent wasted electricity

FOOD + DRINKING WATER

Naturepedic uses energy efficient drinking water stations. The use of these stations saves the fossil fuel and CO2 emissions associated with plastic beverage bottles and their transport, resulting in the elimination of approximately 12 to 13 tons of trucked-in bottled water per year. Each system is Energy Star compliant, and the provider is ISO 14001 certified. These stations are provided in all work areas, in all facilities. Catered food for company events is locally sourced and organic foods and beverages are used as much as possible.

COMMUTING + TELECOMMUTING

Nearly 75% of Naturepedic's employee base in 2020 was Amish. Van transportation is offered to factory employees, with a 100% opt-in rate from our Amish workforce, thereby reducing carbon emissions. As well, staffers in design, sales and management frequently use telecommuting and teleconferencing.

ENERGY + EFFICIENCY

Because of the high level of hand crafting at Naturepedic, electricity consumption is relatively low, with many of the powered tools running on compressed air. Increasing manufacturing capacity has increased electric usage but adding equipment has increased our efficiency in processing sustainable materials.

To contribute to savings in energy and electricity, Naturepedic uses:

- **Renewable Energy Credits (RECs)** - Naturepedic advocates sustainable energy and conserves electricity by maintaining our association with the **EPA Green Power Partnership**. Renewable Energy Credits (RECs) are used by Naturepedic and its Organic Mattress Gallery outlets to offset 100% of its electricity use. By purchasing RECs from Green e-certified provider **Native Energy**, Naturepedic contributes to the conservation and sustainability of our environment.

- **Skylights** - Skylights are used extensively throughout Naturepedic's manufacturing facilities, both in the office areas and the manufacturing areas. The use of natural light helps to offset electricity usage.
- **Energy-efficient bulbs** - Naturepedic uses energy efficient lighting in all workstations, in all facilities, further conserving energy use. In 2020 Naturepedic upgraded its energy efficient light bulbs to state-of-the-art LED lighting resulting in even greater electricity savings.
- **Hand crafting** - Manufacturing procedures, used in all Naturepedic factories, use hand crafting where- ever possible. Push carts and people-powered tools means a reduced carbon footprint (and craftspeople more engaged with their work).

HEATING + COOLING

- **Radiant heat** – Naturepedic uses energy-efficient ceiling-mounted Vantage® radiant heaters in all its factories.
- **Increased insulation** – Naturepedic has redesigned its roof, over the manufacturing areas, for increased energy efficiency. The insulation value was increased to R6.5 per inch of thickness by using a reflective white coating which delivers an 85% reflectivity rate. Maintaining reflectivity means the roof continues to keep the buildings cooler in summer and warmer in winter, minimizing the amount of energy used for climate control.
- **Windows** – Naturepedic windows use double pane glass, in its corporate headquarters. These windows maintain climate conditions in the office areas and reduce overall energy consumption and costs.

ADVOCACY +
MEMBERSHIPS

ZERO TOXICS PRODUCT REGISTRATION

The **Zero Toxics Product Registry** is a 3rd party database that lists reviews of finished products for chemical content and verifies that no toxic substances are present in the product. Naturepedic products are registered.

ONE PERCENT FOR THE PLANET

Naturepedic is a member of **One Percent for the Planet**. They are a global network of businesses, nonprofits and individuals working together for a healthy planet. Naturepedic donates one percent (or more) of annual gross income from mattress sales to approved nonprofits which are dedicated to environmental causes. Naturepedic's 2020 contribution to organizations approved by One Percent for the Planet will be available in July 2021.

SUSTAINABLE FURNISHINGS COUNCIL (SFC)

Naturepedic is an active member of the **Sustainable Furnishings Council (SFC)** and promotes healthier products and sustainable business practices. Naturepedic has achieved SFC GOLD status. Naturepedic is one of only 4 members out of 295 total member businesses that has met the SFC GOLD standard.

AMERICAN SUSTAINABLE BUSINESS COUNCIL (ASBC)

Naturepedic is an active member of the **American Sustainable Business Council (ASBC)** and supports the adoption of sustainable business practices. In conjunction with ASBC, Cancer Free Economy (CFE) and **Children's Environmental Health Network (CHEN)**, Naturepedic has contributed to communicating to the public the increasing trends in children's and infant's cancer. Read the "Childhood Cancer: Cross-Sector Strategies For Prevention" at naturepedic.com.

OHIO SUSTAINABLE BUSINESS COUNCIL (OSBC)

Naturepedic is a member of the **Ohio Sustainable Business Council** (OSBC) and embraces a vision of sustainability encompassing multiple aspects of business. Naturepedic works to educate the public on potential health issues and participates in advocacy and promotion of legislative change in Ohio and the world.

ORGANIC TRADE ASSOCIATION (OTA)

Naturepedic is a member of the **Organic Trade Association** (OTA). OTA's members work together to encourage and protect organic farming practices, and to share messages about the positive environmental attributes of organic products with consumers, the media, and policymakers.

GREEN AMERICA CERTIFIED (GOLD)

Naturepedic is certified by **Green America** to its highest standard, GOLD certification. Through its involvement with Green America and the Green Business Network, Naturepedic conducts its business according to standards that reach beyond contemporary practices in addressing the needs of consumers, employees, communities and the environment.

EMPLOYEE DISCOUNTS

Naturepedic truly believes that sleeping on healthier materials is beneficial to wellbeing and encourages its employees to sleep on its certified organic products. To this end, Naturepedic provides employees with a discounted rate on all mattresses and bedding.

DONATIONS

When the Covid-19 pandemic hit, Naturepedic re-tooled and started making organic cotton face masks. These face masks were donated to local hospitals and sold at cost on the Naturepedic website.

Naturepedic routinely donates new and returned items to charitable organizations and advocacy groups. Naturepedic donates to local area animal shelters to be used for pet beds, providing a comfortable platform for the animals to sleep on and that enhances the animal's welfare.

As part of Naturepedic's mission to be responsible stewards of the planet, Naturepedic and associated brand Happsy work to creatively keep returned mattresses out of the landfill. This is particularly driven by our online-only Happsy brand, which helped pioneer the mattress donation process from its earliest beginning.

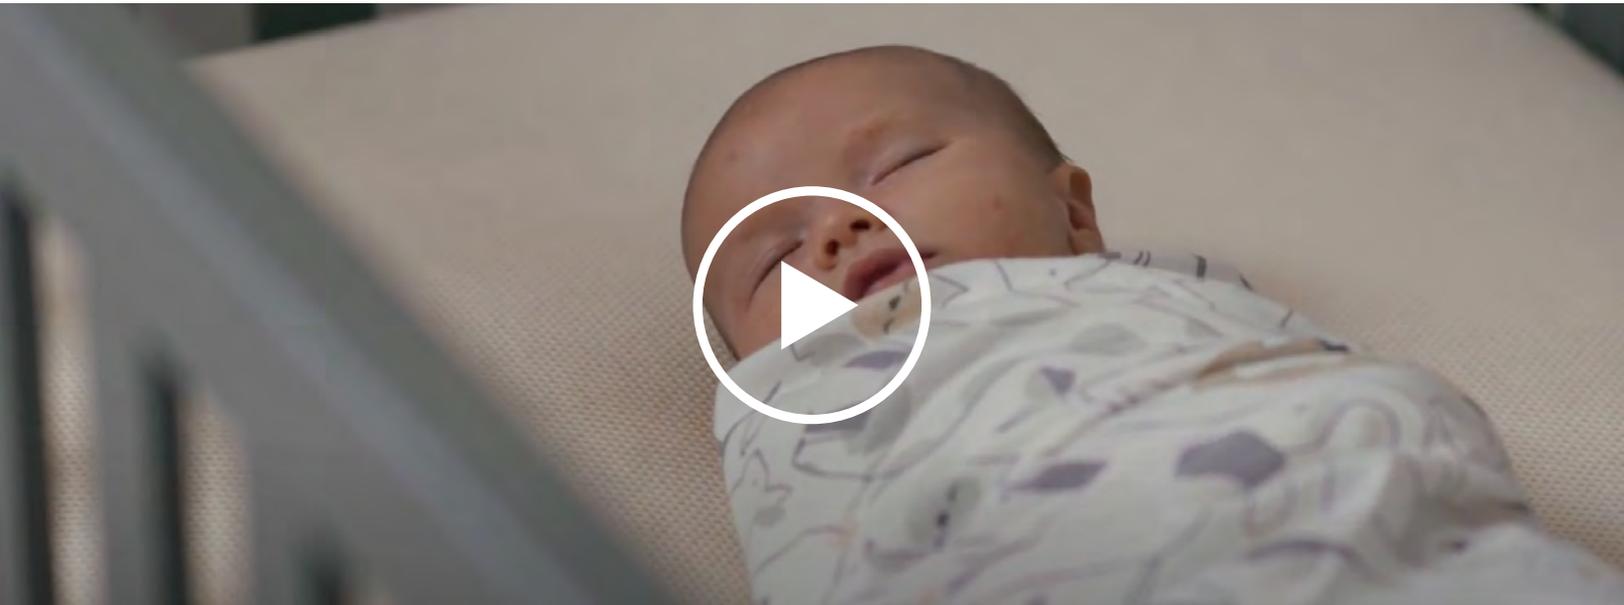

When possible, based on need and local regulations and ordinances, Happsy assists our customers to donate their returned Happsy mattresses to registered 501(c)3 charities. Charities that have received near-new Happsy mattresses include Salvation Army, Habitat for Humanity, and various local charities such as The Mahoney House in Idaho which provides shelter for families that are victim to domestic abuse.

LOOKING OUT FOR MOTHER NATURE

Naturepedic has focused on building bee health into its operations. Organic farming allows for greater biodiversity while not using synthetic pesticides, and the combination of increased food variety, increased habitat and decreased pesticide exposure (particularly the avoidance of neonicotinoids) created by organic farming, can lead to an overall healthier bee, better equipped to fight off naturally occurring pathogens and parasites. Additionally, organic farming practices that allow for non-crop plants to grow can mean more nutritious honey for the hive. This support of organic farming also supports butterflies and bird life. In addition to the above, Naturepedic created its own butterfly and bee habitat on premises.

LOOKING OUT FOR OUR FUTURE

Of all of Naturepedic's customers, the most important are the babies. Babies are our future and our most precious responsibilities. Naturepedic has focused its efforts on protecting infants, children and the environment from toxic chemical substances. We have participated in lobbying efforts to outlaw the use of toxic chemicals in consumer products.

The lobbying efforts entail educating the public, meeting with our politicians in Washington D. C. to make sure that they are aware of the crisis at hand and supporting the battle against poisoning the next generation. Naturepedic fights against allowing infants and children to come in contact with products that contain dangerous chemicals, i.e. crib mattresses and more. Naturepedic sounds the alarm that we need to make consumer products using non-toxic materials only. The next generation and the planet depend on it.

In 2020, Naturepedic became part of the Childhood Cancer Prevention Initiative and partnered with many other advocacy groups to bring this epidemic out into the open by education the public and lobbying lawmakers. Naturepedic helped produce a report for public distribution and can be found at [here](#).

WE CAN ALWAYS DO BETTER

We began from a desire to make safer, healthier and more environmentally sound sleep products. With that came a commitment from the Naturepedic family to our global family – to make the world a better place for us, our children and our children’s children.

WHAT THAT MEANS

Naturepedic sincerely strives to make the world a better place, and we take the long view of what the word “world” means. Using certified organic cotton fabrics and sustainable materials certainly means fewer toxic chemicals in the bedroom, but it also mean a reduction in toxic pesticides on croplands and the creation of healthier soils. Using certified organic latex provides supportive comfort for restful sleep, but it also means a sustainable agricultural crop that removes thousands upon thousands of metric tons of CO2 from the environment each year.

Using organic materials and sustainable manufacturing also supports safer conditions for manufacturing workers by not having them work with questionable, hazardous synthetic materials. Naturepedic supports worker safety and welfare. That support is verified and certified by independent reviews.

In 2020, Naturepedic audited and reviewed its logistical and warehousing structure to reduce over-the- road emissions by streamlining shipments. The company continues to seek out innovative ways to reduce production waste and, when produced, reuse and recycle that waste. Naturepedic continually looks for ways to ensure that packaging is more environmentally friendly.

THE FUTURE

We cannot stand still, we will continue to improve our environmental impact on the world with more positive, sustainable changes in the coming year.

TO BECOME CARBON NEUTRAL IN 2021

Naturepedic has entered into a plan with **Climate Neutral** and **Native Energy** to evaluate and offset the carbon footprint of our company. Naturepedic has measured its carbon footprint and will purchase carbon offsets during the 2021 fiscal year. These carbon offsets will be used to fund solar energy, hydroelectric power, wind power, re-forestation, energy efficiency projects and environmental sustainability projects.

TO BECOME GREENSCREEN CERTIFIED IN 2021

Naturepedic is always striving to meet the highest chemical free standards and in 2021 will be entering the process to become GreenScreen certified for all their products. GreenScreen is one of, if not the most, stringent evaluators of product chemical content and related chemical toxicities. For a preview about GreenScreen, go to [greenscreencertified.org](https://www.greenscreencertified.org).

TO BRING ORGANIC MATERIALS CLOSER TO HOME IN 2021

Naturepedic has always strived to source organic materials in the US to reduce global carbon emission. This year the company will be breaking ground with an agro-consortium of NGO's to provide a systemic solution that addresses food insecurity, climate change mitigation, reforestation and soil reclamation. This eco-regeneration project will provide a close to home resource for organic materials which will in turn reduce carbon emissions.

The goal of Naturepedic as a company is to make products that support human health and the health of the planet. It's all interconnected. Sustainability is never an end point, but an evolving goal. A leader in healthier mattresses, the company measures its business and environmental goals against its own potential. Naturepedic will continue to push organic innovation and sustainability in the years ahead.
